No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      Sequence 16,

Sequence 45777, Application US/10767701
GENERAL INFORMATION:
APPLICANT: Kovalic, David K.
APPLICANT: Zhou, Yihua
APPLICANT: Zhou, Yihua
APPLICANT: Cao, Yongwei
ITTLE OF INVENTION: Nucleic Acid Molecules and Other Molecules Associated With
ITTLE OF INVENTION: Plants and Uses Thereof For Plant Improvement
TITLE OF INVENTION: 1912535)B
CURRENT APPLICATION NUMBER: 1051407777101
CURRENT PILING DATE: 2004-01-29
NUMBER OF SEQ ID NOS: 63128
SEQ ID NO 45777

Sequence 23, Application US/10153919
Fatent No. 6858420
GENERAL INFORMATION:
APPLICANT: YAN, Chunhua et al.
TITLE OF INVENTION: ISOLATED HUMAN KINASE PROTEINS, NUCLEIC
TITLE OF INVENTION: ACID MOLECULES ENCODING HUMAN KINASE PROTEINS, AND USES
TITLE OF INVENTION: THERROF
TITLE OF INVENTION: THERROF

Batent No. 6413756
GENERAL INFORMATION:
APPLICANT: YAN, Chunhua et al
TITLE OF INVENTION: ISOLATED HUMAN KINASE PROTEINS, NUCLEIC
TITLE OF INVENTION: ACID MOLECULES ENCODING HUMAN KINASE PROTEINS, AND ITTLE OF INVENTION: THERROF
FILE REFERENCE: CLOOGES3
CURRENT APPLICATION NUMBER: US/09/739,455
CURRENT FILING DATE: 2000-12-19
NUMBER OF SEQ ID NOS: 23
APPLICANT: YAN, Chunhua et al
TITLE OF INVENTION: ISOLATED HUMAN KINASE PROTEINS, NUCLEIC
TITLE OF INVENTION: ACID MOLECULES ENCODING HUMAN KINASE PROTEINS, AND
TITLE OF INVENTION: THEREOF
TITLE OF INVENTION: THEREOF

833635
mitogen-activated protein kinase homolog (clone D5) - garden pea
NiAlternate names: MAP kinase homolog
C; Species: Pisum sativum (garden pea)
C; Species: Pisum sativum (garden pea)
C; Species: Disum sativum (garden pea)
C; Stafstrom; J.P.; Altechuler, M.; Anderson, D.H.
C; Accession: S33635; S31836
R; Stafstrom, J.P.; Altechuler, M.; Anderson, D.H.
Plant Mol. Biol. 22, 83-90, 1993
A; Title: Molecular cloning and expression of a MAP kinase homologue from pea.
A; Reference number: S33635; MUID:93271463; PMID:8388749
A; Accession: S33635
A; Molecule type: mRNA
A; Residues: 1-394 ASTA,
A; Cross-references: UNIPROT:Q06060; UNIPARC:UPI000012EBC5; EMBL:X70703; NID:g20807; PIDN
C; Superfamily: Kinase-related transforming protein; protein kinase homology
C; Keywords: ATP; phosphoprotein; phosphotransferase; serine/threonine-specific protein k
F; 59-347/Domain: protein kinase ATP-binding motif
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    uitogen-activated protein kinase 6 (EC 2.7.1.-) - common tobacco
MyAlternate names: serine/threonine-specific protein kinase p43Ntf6
C;Species: Nicotiana tabacum (common tobacco)
C;Date: 07-May-1995 #sequence_revision 01-Sep-1995 #text_change 09-Jul-2004
C;Accession: 868189; S31320
